Copy of Version Notes for this Week:

- Added Hotel search function connected to city search for weather
- Created API link for hotel search
- Added link for hotels that takes you to booking page
- Streamlined weather, added icons for it
- First attempt at streamlining weather data
- Sorted hotels by rating
- Additional Formatting and Styling Changes
- Start of "My Trips Page" (Work in Progress)

Plan for Following Week:

- Modify the "My Trips Page" so that when we click the "Add to My Trips" Button it displays the hotel we selected
- Ensure that is saves all previous data for different selected hotels
- Add button that allows us to share the hotels we picked to different social medias
- Modify the Weather data to show Highs & Lows only (tentative plan) and work on time displayed for weather provided
- Styling modifications
